PRODUCT DATA

ATLANTIC LITHIUM COMPLEX GREASE- HIGH TEMPERATURE- LITHIUM COMPLEX GREASE DESCRIPTION & APPLICATIONS

ATLANTIC LITHIUM COMPLEX GREASEs – 1/ 2/ 3 is a series of high quality, lithium complex grease having high water tolerance and mechanical stability, combined with excellent high temperature performance. These are ideally suited for application by centralized grease systems due to good resistance to oil separation under pressure mechanical stability.

ATLANTIC LITHIUM COMPLEX GREASEs – 1/ 2/ 3 provide excellent performance in anti-friction bearings and much longer life compared to Sodium or Lithium soap base greases. It is recommended for wheel bearings, earth moving equipment, gear couplings, electric motors and general industrial machinery. These greases are widely used in Steel Plants, Mining and Engineering Industry

PRODUCT BENEFITS

- Long service life.
- Good shear –stability and resistance to vibration
- High temperature grease
- Low friction torque.
- Good pumpability.
- Resistant to wash –off by water

ATLANTIC BENTONITE GREASE - HIGH TEMPERATURE BENTONE CLAY GREASE DESCRIPTION & APPLICATIONS

ATLANTIC BENTONITE GREASE is High temperature bentone clay grease for the lubrication of slow moving mechanisms subjected to very high temperatures. It allows peak temperatures up to 220°C, provided that the period of operation at this temperature is limited and that the equipment is re-greased frequently.

ATLANTIC BENTONITE GREASE offers the possibility of working in a corrosive atmosphere due to its resistance to mild alkaline and acidic solutions.

PRODUCT BENEFITS

- Excellent resistance to high temperatures
- Very good mechanical stability
- Very good anti-wear properties
- Resistant to mild alkaline and acidic solutions.
- Good pumpability.
- Lead free- Environmentally safe
